Usman Hameed

(415) 690-9346 | usmanhvmeed@gmail.com | Portfolio | LinkedIn | Github | San Francisco, CA

Skills
JavaScript, TypeScript, React, Redux, Ruby, Rails, Node, Express, Next, HTML, CSS, jQuery, Mongoose, MongoDB, MySQL, PostgreSQL, SQLite3, AWS S3, Google Cloud, RSpec, Webpack, NPM, Git, Heroku,

Projects

NoiseCloud   **Live Site | Github**
a full-stack Music app made with React, Redux, Ruby, Rails, PostgreSQL, JBuilder, jQuery, S3, HTML, CSS
- Built CRUD functionalities identical to SoundCloud's streaming service using a Ruby on Rails backend and a JavaScript, React, and Redux frontend.
- Implemented backend associations in specific Rails models to store image and audio files via AWS S3 cloud storage, easing server load and scaling.
- Produced a functional frontend which implements React components and functions that specify the applications activity based on local state changes for a smooth user interface

SelfBook   **Live Site | Github**
a full-stack Social Media app made with Mongo, Express, React, Redux, JavaScript, Node, HTML, CSS
- Implemented backend user authentication to restrict site access using BCrypt's salting and hashing methods, ensuring password protection and information confidentiality
- Developed a MongoDB database that uses Mongoose to effectively store and dispatch data, enhancing app performance and allowing for scalability
- Built the frontend components, CSS design, effects, and animations to mimic modern applications for a smooth user experience

VidTok   **Live Site | Github**
a full-stack Video app made with TypeScript, React, Redux, Next.js, Sanity, HTML, CSS
- Implemented CRUD functionalities for user posts, likes, and comments using purely TypeScript on the front-end, similar to TikTok's UI
- Produced functionality for searching videos and users using React Hooks and custom API calls
- Implemented Google OAuth 2.0 authentication to allow users to sign in/out via Google

Professional Experience

Fight Culture LLC   Live Site | Github   March 2022 - March 2023
Software Developer
- Developed the front-end using React and Next.js to design site pages, navigation, & features
- Implemented responsive React components to enhance user experience and user interface
- Testing and debugging code across all browsers, devices, and platforms to ensure site availability

Fragomen LLP
Assistant Paralegal   December 2019 - March 2020
- Collaborated with attorneys to assist in immigrant visa petitions and applications
- Updated forms, petitions, and other data in a case management database of over 100,000 clients
- Drafted government forms and letters following processing and procedural requirements

Education

App Academy - *Immersive software development course with focus on full stack web development*   2021
San Francisco State University - *Bachelor's of Arts in Philosophy, emphasis in Law*   2019
